

JAWS pdf creator® v5.0

Jaws PDF Creator enables businesses to easily create PDF documents that can be shared across a wide range of hardware and software. Jaws PDF Creator provides a simple and intuitive means of creating high-quality PDF files from any application and helps small and large businesses save time and money.

Jaws PDF Creator installs as a printer in the Microsoft® Windows® Printing System allowing users to 'print' to a PDF file directly from

any application. 'Intelligent' PDF files that contain bookmarks and hyperlinks can also be created providing solutions for integration into document management systems as well as for further processing such as amalgamating files into larger documents.

Whether you're a corporation, a graphic designer or a web publisher, Jaws PDF Creator offers a user-friendly, affordable solution for creating high-quality and configurable PDF documents.

PDF Creation made easy!

Jaws PDF Creator operates in several modes:

- If you can print, you can easily create PDF files. No training is required. It installs as a printer in the Windows Printing System. This allows users to 'print' to a PDF file directly from any application. Jaws PDF Creator looks and behaves exactly like any other printer
- On supported platforms it installs as a toolbar icon in Microsoft Word®, Excel® and PowerPoint® allowing business users to easily create 'intelligent' PDF files.

Create 'intelligent' PDF files

'Intelligent' PDF files retain document structures such as bookmarks and hyperlinks from the original document and can be created using

toolbar icons that install in Microsoft Excel, PowerPoint and Word. These tools become very important for navigating and repurposing PDF files, especially when they are used within Document Management Systems.

Protection for your documents

Business documents such as legal contracts or business proposals are often confidential. Jaws PDF Creator provides capabilities to limit certain features, such as viewing, printing and editing by applying user defined passwords. Jaws PDF Creator uses 128-bit encryption using the BSAFE® library from RSA Corporation to secure PDF files.

PDF optimization

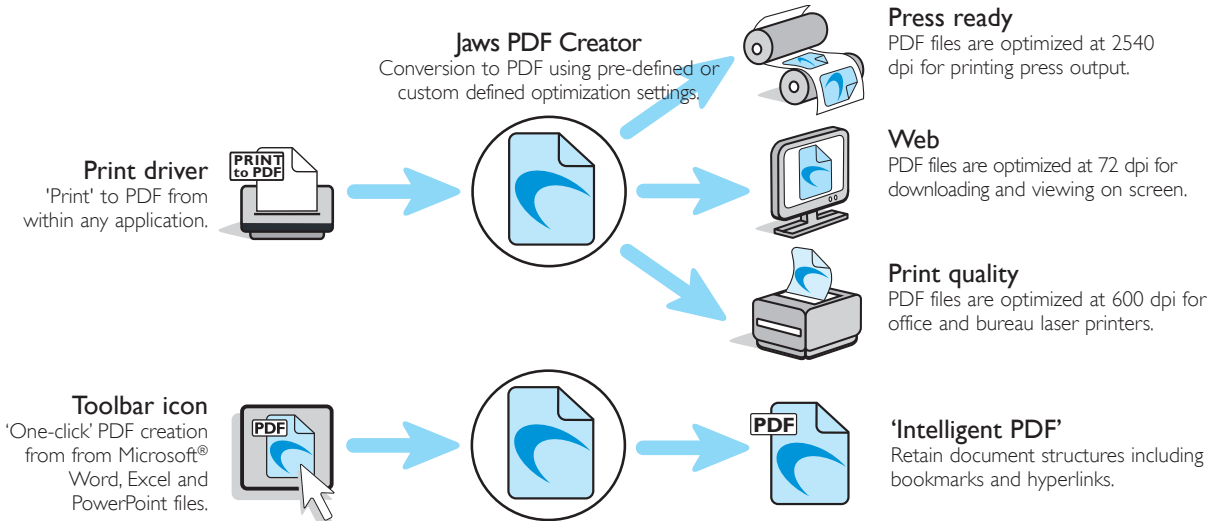

Jaws PDF Creator ships with three pre-defined configurations which enable the creation of PDF files optimized for high resolution production

printing, printing to desktop devices, or; publishing on the web. Users can also define and save their own custom output configurations. The Import and export of defined configurations allows the sharing of corporate standards.

Pedigree in PDF

Global Graphics has been developing and refining PDF creation tools from the inception of the PDF format in 1993. An expert developing technology for page description languages, including PostScript® and XPS, the Company continues to implement the latest features and solutions around the open format PDF Specification. Jaws PDF products are based on a robust, mature and high-quality PDF engine that is well known and respected in the industry.

Jaws PDF Creator Simple PDF creation for global document exchange.

Technical specifications

General

Distill PostScript/EPS files
 ASCII Encoding options
 User control of "auto rotate" pages function
 Create PDF 1.3, 1.4, or 1.5 format
 Distill with prologue.ps/epilogue.ps files
 Add thumbnails (color or B/W)

Compression Options

Downsampling - average
 Downsampling - subsample
 Downsampling - bicubic
 ZIP Compression
 JPEG Compression (high, medium, low)
 Compress text and line art
 Distill graphics that use LZW compression

One-click PDF Creation

Toolbar buttons to create PDFs change settings or send PDFs as email attachment from Microsoft Word, Excel & PowerPoint for Windows
 Automatically create 'intelligent' PDFs with bookmarks, links, metadata and security
 Crop pages
 Add text watermarks
 Include transitions in PowerPoint

Font

Embed all fonts
 Optionally embed base 14 fonts
 Subset fonts
 Embed TrueType® as unhinted Type1/Type3 fonts
 Use original TrueType fonts
 Support for CID fonts (Type 0 and 2)

Prepress plug-ins

For PDF/X output
 For producing Ghent Workgroup compliant PDF files

Advanced Options

Preserve OPI 1.3 comments
 Preserve OPI 2.0 comments
 Preserve overprint settings
 Preserve halftone settings
 Preserve transfer functions
 Preserve undercolor removal/black generation
 Automatic spot color handling
 Convert CMYK to RGB
 CIE-based color spaces stored as CalGray, CalRGB, Lab or ICC profiles

Additional Functionality

Print directly to PDF from any application
 Optimized settings for press, print and web
 Option to save user defined configurations
 Option to import and export user defined configurations
 Password security using 128-bit encryption from RSA Corporation
 Support for Linearization / Fast Web Viewing
 Option to output files to a specified folder
 Execute another application on completion
 View PDF file after creation
 Always overwrite existing PDF file
 Send the PDF as an email attachment

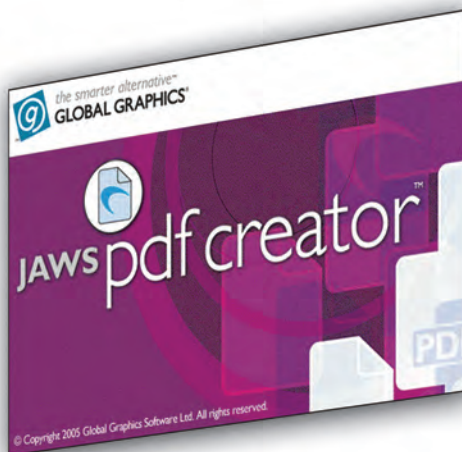

Platform support

32 bit platforms:

Windows XP, Vista and 2003 Server.
 Microsoft Office XP, 2003, 2007.
 Windows 2003 Server running Terminal Services.
 Windows 2003 Server running Citrix Presentation Server 4.0 and 4.5.

64 bit platforms:

Runs on Windows x64 and Windows 2003 Server x64.
 Vista 64 bit platforms not supported.
